Huntsville Utilities Selects Global Software, Inc.' s Spreadsheet Server for use with SAP®

RALEIGH, NC USA (2nd November, 2015) — Global Software, Inc., the innovative leader of Microsoft® Excel-based automation and reporting tools to leading Enterprise Resource Planning (ERP) and Business Intelligence (BI), announces today that Huntsville, Alabama based company, Huntsville Utilities, has selected Global's Spreadsheet Server for use with SAP® powered by the QueryExchange™. Spreadsheet Server works as an intuitive, Excel based reporting platform, providing live financial and operational reporting and analysis from SAP into Excel. This empowers end users with the ability to use familiar Excel features and functions to create dynamic dashboard views from SAP. These views can be accessed, automated and presented with our formula driven methodology, including summary balances and detailed drill-downs. In addition, the Huntsville Utilities will leverage the Distribution Manager publishing utility, which empowers users to automate the delivery of key business information.

Huntsville Utilities brings value to the community by efficiently delivering utility services by way of water, gas and electric. Water sources derive from the Tennessee River and is then treated in accordance with rules and regulations determined by the Alabama Department of Environmental Management and the EPA. Supply for gas is produced on and offshore, with two major pipelines transporting it to Huntsville Utilities for distribution. The Tennessee Valley Authority provides electricity, which is distributed through Madison County. More information can be found at http://hsvutil.org/.
